This document is provided "as is" and Bayalink Solutions Corp. assumes no responsibility for any typographical, technical, or other inaccuracies in this document. Bayalink Solutions Corp. reserves the right to change information contained in this document without notice.

The Citrix, Outlook, Outlook Web access, BlackBerry and RIM families of related marks, images, and symbols are the exclusive properties of their respective owners.

Licensing Background

There are several ways to license Bayalink Liberty. Customers can buy single licenses, departmental licenses or even site licenses for large organizations.

Based upon the recommended deployment scenario your organization may or may not need the Liberty key as part of the deployment. This is however irrelevant to Liberty licensing.

The Liberty license is tied to the PIN of the BlackBerry.

License Changes

It is common to have periodic device changes in the user community. Bayalink provides 2 self-service utilities to make this process easy. Individual users can visit the support section of the Bayalink website. On this webpage the user will find a license transfer utility.

For bulk transfers or for individual transfers on behalf of the user, the BES admin can get access to the provisioning portal by contacting Bayalink.

Licensing Costs

Bayalink Liberty is licensed as a one year term license. The license will expire after one year and can be renewed in subsequent years an unlimited number of times. The single user MSRP for Liberty is \$100 Canadian Dollars per year per user. Pricing scales according to the volume purchased. Please contact Bayalink or a certified Bayalink Reseller for more detailed pricing info.

What is included in the licensing fees?

Included with the licensing fee is the Liberty key hardware, the Liberty handheld software license, technical support, upgrades and updates.
